THE FEEL OF A TURF AND HARD TO LEET

THE GAME HAS CHANGED.

SO HAS THE PRACTICE.

THE ENDLESS PURSUIT TO DEVELOP ONE'S ABILITY HAS ADVANCED EVERY ASPECT OF GOLF - FROM THE TOOLS TO THE TACTICS. THE ONE CONSTANT IS THE BURNING DESIRE TO PLAY A BETTER GAME.

Generations ago, this meant playing lessons during a round with the club pro. Even great courses provided only chipping and putting amenities to help improve skill and lower scores.

The evolution of recreational driving ranges – where balls were hit from hard mats with only a driver – into the latest dedicated golf practice facilities is a result of many advances in technology. Microchips measure target accuracy. Ballistic and video cameras analyze ball flight and swing. Heating and cooling systems provide comfort during endless hours of training. Advanced polymers have created more durable true flight balls. But perhaps the most significant development for golf practice is bringing the feel and play of real grass right into the tee box.

Fiberbuilt®'s industry-leading "long fiber grass" helps novices to pros improve their game by providing true fairway feel in an extremely durable golf mat.

We know how important practice is. And by improving the training experience, we are helping golfers play a better game.

FIBERBUILT® · GRASS · TECHNOLOGY

We instill a deep appreciation of natural aesthetics, quality and durability in all of our golf products along with a commitment to constant research and development.

OUR PURSUIT OF EXCELLENCE REGULARLY SETS NEW INDUSTRY STANDARDS.

Our unique Fiberbuilt® Grass Technology is used throughout the world by teaching professionals like Leo Zampedro – Northern Ohio PGA Hall of Fame inductee, and Barb Mucha – five-time LPGA Tour Champion and range owner. Our patented Fiberbuilt® “long fiber grass” lets golfers hit down and through the ball, allowing for a proper swing and true fairway feel, with no hand shock or arm injury.

Successful golf club manufacturers such as Taylor Made® test their latest designs on our patented Fiberbuilt® “long fiber grass.” This industry-leading surface plays and feels like real grass, yet is extremely durable.

When golf training and simulator companies around the world create new practice and training products, the grass technology they rely on is Fiberbuilt®. The worldwide leader in golf simulation – Full Swing Golf – wanted a true and realistic feel for fairway, rough and sand conditions. Fiberbuilt® Grass Technology is their choice.

The Golf Industry Association has awarded Fiberbuilt® Manufacturing Inc. the prestigious 'Certificate of Excellence' for the best golf mat in the industry, a distinct recognition of our unique technology, quality workmanship and product performance.

IN 2003, THE INDEPENDENT GOLF TESTING COMPANY, GOLF TEST USA, TESTED VARIOUS MATS FROM THE INDUSTRY. FIBERBUILT® ACHIEVED THE HIGHEST OVERALL RATING IN THE INDUSTRY, OBTAINING THE GOLF TEST USA SEAL OF EXCELLENCE. THE BEST OVERALL RATING WAS BASED ON THE CRITERIA OF APPEARANCE, DURABILITY, STANCE, HITTING SURFACE, QUALITY AND CHIPPING.

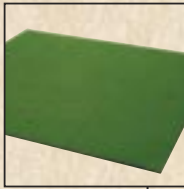

**FIBERBUILT® · GOLF · MAT · SYSTEMS**

**OUR INDUSTRY-LEADING HITTING
SURFACE IS JUST ONE ELEMENT OF
OUR COMPONENT GOLF MAT SYSTEMS.**

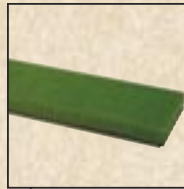

Our user friendly component golf mat system provides an economical advantage over traditional one piece turf mats. Fiberbuilt® components can be rotated to extend the life of the golf mat system. Individual components can also be replaced as needed. Instead of replacing a complete one-piece golf mat, Fiberbuilt®'s individual components can easily and inexpensively be replaced on-site.

401 OR 488

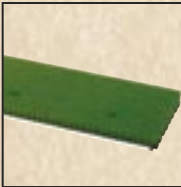

The stance mat can be either durable turf or high traction custom molded black rubber. The stance mat is square allowing for 90 degree rotation to extend wear.

FIBERBUILT® GRASS ACCESSORIES

Numerous variations of Fiberbuilt® Grass are available for teaching and training.

305/40-4

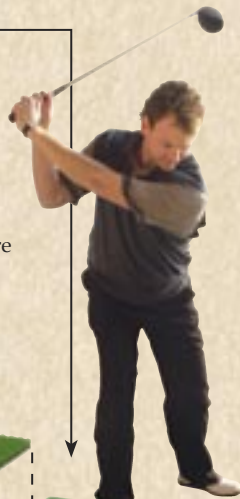

The Fiberbuilt® Grass section of each mat is made up of 1' X 1' interlocking square grass panels. These squares can be rotated to balance wear, or be replaced as needed.

GOLF TEES

Our unique Fiberbuilt® Friction Fit Golf Tee allows golfers to adjust a real wooden tee to their preference. Standard hollow golf tees are also available.

555R

Made from the same durable rubber as the frame, our ball tray keeps balls directed away from the players swing and the design makes it quick and easy to move balls from tray to mat.

325

A large volume tray that will hold over 400 balls placed randomly or 340 balls when stacked using the pyramid stacker. Built-in gutter system keeps balls from rolling away.

S24R-F

Our molded rubber foundations withstand years of high-impact blows and constant temperature changes. Keeping your mat looking 'like new' will be effortless.

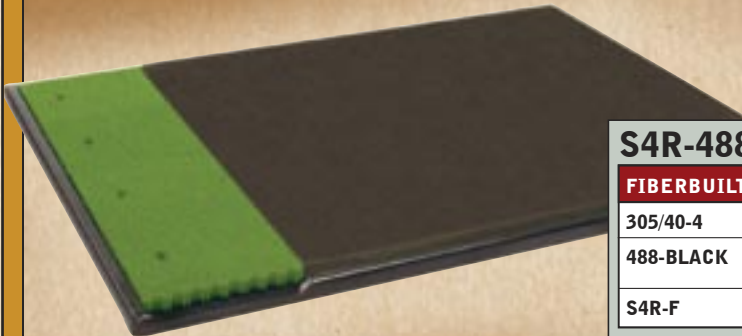

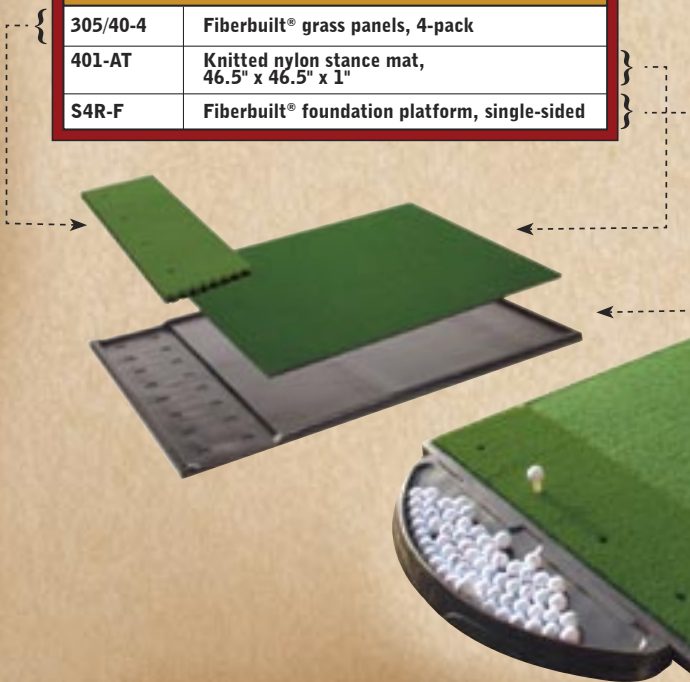

GOLF · MAT · SYSTEMS

S4R-401 (COMPLETE UNIT)

FIBERBUILT® 4' X 5' GOLF MAT SYSTEM INCLUDES:

305/40-4	Fiberbuilt® grass panels, 4-pack
401-AT	Knitted nylon stance mat, 46.5" x 46.5" x 1"
S4R-F	Fiberbuilt® foundation platform, single-sided

S4R-488 (COMPLETE UNIT)

FIBERBUILT® 4' X 5' GOLF MAT SYSTEM INCLUDES:

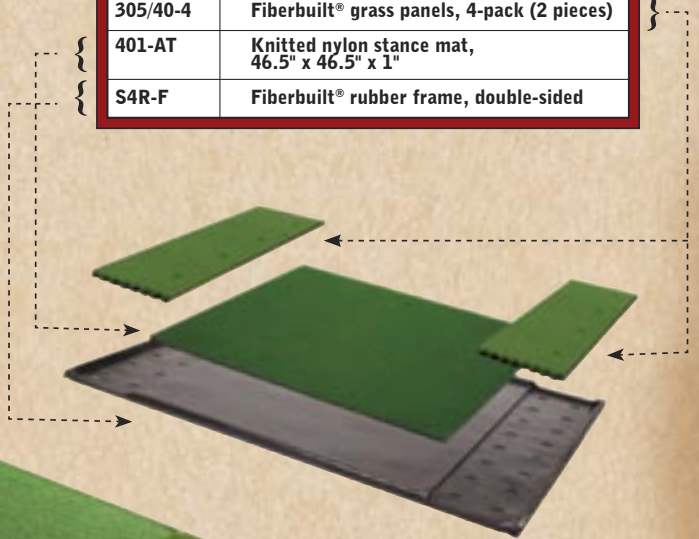

305/40-4	Fiberbuilt® grass panels, 4-pack
488-BLACK	Fiberbuilt® black textured rubber stance mat, 46.5" x 46.5" x 1"
S4R-F	Fiberbuilt® rubber frame, single-sided

S24R-401 (COMPLETE UNIT)

FIBERBUILT® 4' X 6' GOLF MAT SYSTEM INCLUDES:

305/40-4	Fiberbuilt® grass panels, 4-pack (2 pieces)
401-AT	Knitted nylon stance mat, 46.5" x 46.5" x 1"
S4R-F	Fiberbuilt® rubber frame, double-sided

S24R-488 (COMPLETE UNIT)

FIBERBUILT® 4' X 6' GOLF MAT SYSTEM INCLUDES:

305/40-4	Fiberbuilt® grass panels, 4-pack (2 pieces)
488-BLACK	Fiberbuilt® black textured rubber stance mat, 46.5" x 46.5" x 1"
S24R-F	Fiberbuilt® rubber frame, double-sided

BALL TRAYS

555R

FIBERBUILT® BALL WING

Rubber ball tray, black

325

FIBERBUILT® BALL TRAY

Rubber ball tray includes molded holes in stacker base

5340

PYRAMID BALL STACKER MOLD

For use with 325 ball tray
